RingCentral for Google

Create a powerful business communications hub by seamlessly integrating RingCentral communications and collaboration solutions with Google Cloud.

With deep integrations across the Google ecosystem, easy-to-use RingCentral solutions bring powerful communications and collaboration capabilities into the business tools you use every day. RingCentral for Google makes it easy for your teams to access key RingCentral features without leaving their persistent Google applications. The result? Simplified workflows and a boost in productivity across your entire organization.

Features and benefits

Seamless integration

Google Chrome™

- Manage your call settings and view communications history with the RingCentral for Chrome Extension on your Chromebook™ or in your Chrome Browser™.

- Combine your RingCentral and Google contacts in one easy-to-search screen.

- Click-to-dial or click-to-SMS phone numbers within G Suite applications such as Gmail™, Docs™, and Chrome browser.

Streamlined communications

Docs

- Fax Google Docs instantaneously with the RingCentral Fax® plug-in.

- Click to dial or click to SMS phone numbers within a Google Docs.

Gmail

- Access to your RingCentral Phone dialer within Gmail.

- Natively call and message contacts directly from email conversations.

Drive

- Import files from Google Drive into RingCentral Glip™ conversations and RingCentral Meetings.

- Automatically save voice recordings, text messages, voicemails, and faxes to Google Drive using RingCentral Archiver.
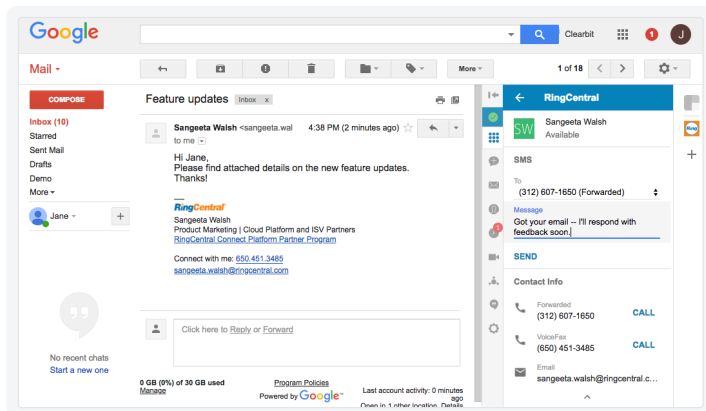

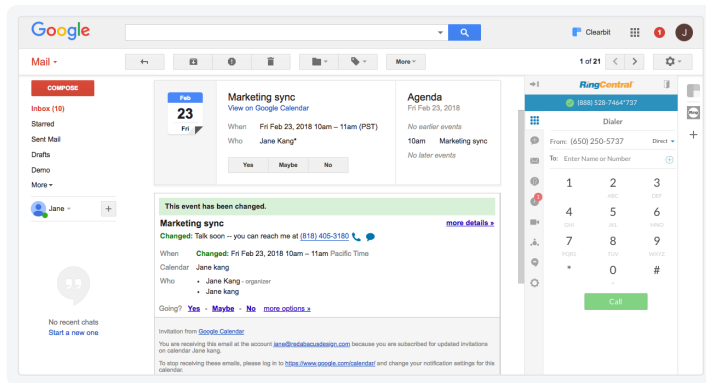

Productive collaboration

Calendar

- Schedule and join RingCentral Meetings and conference calls.

Hangouts Chat

- Seamlessly initiate RingCentral video and audio conferences within Google Hangouts Chat.

Simplified administration

Google login

- Use your Gmail credentials to sign in to RingCentral applications.

Google Single Sign-on (SSO)

- Use a single set of credentials to access all your company applications.
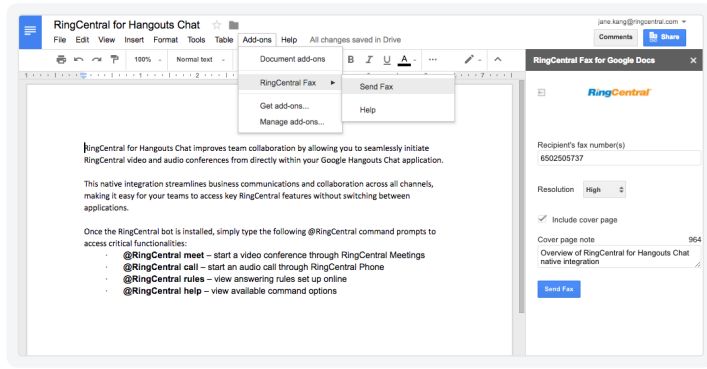

Google Cloud Directory

- Automatically provision G Suite users into RingCentral.

How it works

Google Chrome/click-to-dial

Dial numbers manually using the RingCentral Phone dial pad, or click to dial any number in your Chrome browser.

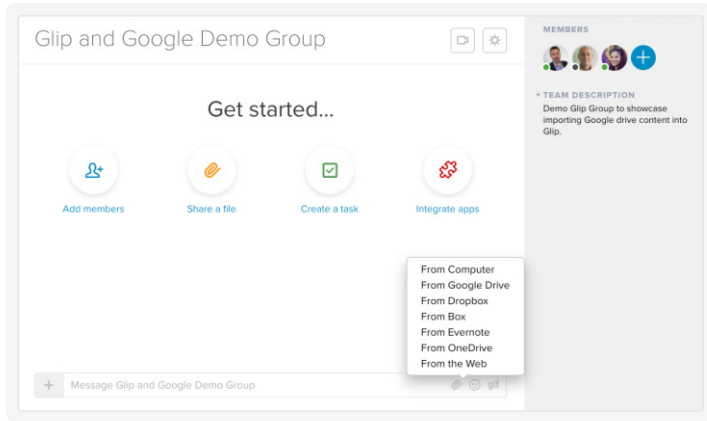

RingCentral for Gmail

Surface contextual details to view, call, and message contacts within an email conversation.
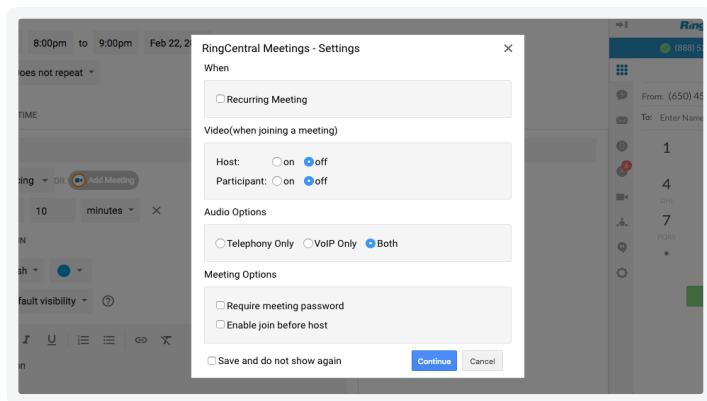

Docs

Easily fax Google Docs with custom cover pages.

Drive

Import files from Google Drive into team messaging and automatically archive communications data to your Google Drive account.

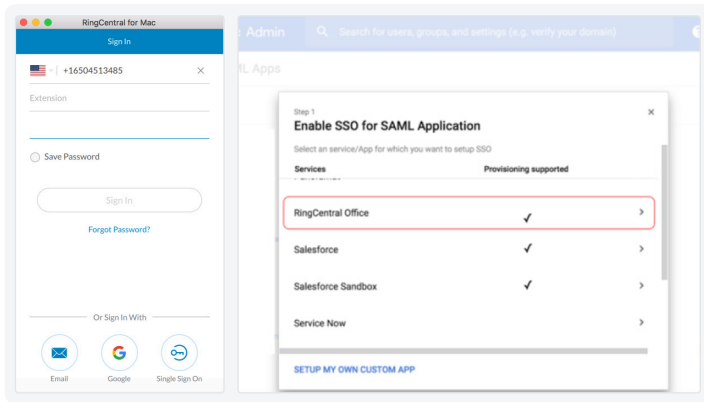

Calendar

Schedule and join RingCentral meetings in Google Calendar™.

Hangouts Chat

Initiate RingCentral video and audio conferences within Google Hangouts Chat.

Google SSO

Configure RingCentral for SSO in your G Suite Admin console to log in with a single set of company credentials.

Requirements

- RingCentral for Google Chrome Extension is available to all RingCentral Office® customers. Once installed from the Chrome Web Store, ensure it's an enabled extension within your Chrome browser. You do not have to be a Gmail user to utilize the Chrome Extension.

- Windows® XP (or later) or Mac OS X® 10.8 Mountain Lion (or later) operating systems and Ubuntu support for Chrome Extension are required.

- Google Chrome 30 (or later) is required.

- To utilize Google login, Google SSO, and/or RingCentral for Gmail, you must be a G Suite user and log in with credentials associated with your RingCentral account.
